

Conducting the Instrument Proficiency Check

The Instrument Proficiency Check is a condensed version of a Instrument Practical Test. During this seminar, we will review what is required of the Instrument Flight Instructor when conducting an adequate IPC in accordance with CFR 61.57 (c) and (d). We will go over what the instructors responsibilities are, how they should go about determining that the applicant has demonstrated the knowledge and skills, and how to determine if the applicant has met the standards to pass the IPC.

Directions: Million Air FBO is located South of the Main Terminal Building on Jetway Drive at the Albany, NY Airport.
