

Is There a Multi-Engine Rating or a Multi-Engine Airplane in your Future

During this two hour seminar, Fred Lee will discuss the question, "Why fly a twin?" Most pilots look to obtain a multi-engine rating only when they are working towards a career in aviation. With fuel costs rising, the typical aircraft owner rejects the idea of two gas guzzling engines. Aircraft owners are often content to stay with the less complex single engine options, and renting of a twin engine aircraft is rarely an option. Come join the conversation and explore safe options for training and ownership that could open the door to this exciting side of flying.

The Saratoga County Airport is located Southwest of Saratoga in Ballston Spa NY. Take Geyser Road to the airport entrance, parking is directly in front of the main building. This seminar will be held in the upstairs conference room of the newly renovated FBO Building.
