

Cambridge Airport - Single Pilot Operations CRM Using Foreflight

This two hour seminar will be beneficial to pilots of all ages. Our speakers, Michael Levy and Tad Yergey will begin our discussion describing the challenges of single pilot operations and how cockpit resource management (CRM) can help. They will discuss how modern electronic flight bags such as the commonly used Fore-Flight App, can enhance flight safety sharpen situational awareness for the single pilot.

By applying Single Pilot Resource Management (SRM) principles, pilots attending this session will be able to create a clear end-to-end workflow that covers weather briefings, performance calculations, route planning, and in-flight information needed to maintain situational awareness. This session will review terrain and obstacle alerts, interactive weather overlay, and ADS-B In traffic and weather displays. These reduce midair risk and strengthen decision making while in flight.

Join us for practical tips to make every flight safer, more efficient, and far less stressful.

From the town of Cambridge, take North Park Street to Route 22N, turn right on 64, then continue onto Fish Hatchery road for a short period of time. Turn right onto Plains Road, then right again onto Airport Drive. The event will be held on the airport grounds in the large hanger on the north side of the airport.
