FAASTeam presents:

Mountain Flying

This two hour event, coordinated by the Albany FAASTeam and presented by FAASTeam Representative, Ningyun Cai. It will contain information of interest to all pilots.

In this month's seminar, we will engage in a captivating discussion on mountain flying. While our mountains in the Northeast are smaller than those in the Western United States, flying in mountainous terrain here still present unique challenges. We will explore these challenges and identify strategies to mitigate the associated risks when navigating mountainous areas.

This two hour event will be held at Av Flight, located at the southeast side of the airport below the beacon and tower. This seminar will be held in the 1st floor Conference Room at Av Flight at the Plattburgh Airport. Street address: 1 Alabama Street, Plattburgh, NY. No landing and facility fees for aircraft <12,500lb.
