

Wings & Wheels Fly-in, Cruise-In

More accidents occur in the landing phase of flight than any other. It is the close proximity to the ground that leaves less margin for error. Some pilots never really master the basics, then it's only a matter of time before they have a problem. Effective strategies for mitigating human factors errors in the landing phase of flight is the focus of "Why Pilots Get The Blame".

Directions: I-376 to State Route 224, bear right at Parktown Hotel, travel one mile south of State Route 224. Also see the Map Link in the Additional Information Section.

A message from the National FAASTeam Manager

Over 136,600 pilots earned WINGS credits last year. Will you, this year?
