

Design, Maintenance and Certification of Experimental Aircraft

At this event we will begin with a discussion of the benefits of the faasafety.gov website and how to use it. We will also take a look at local accidents, which were caused by maintenance errors in an effort to prevent the same type of mistakes from reoccurring. And finally we will discuss what you need to apply for an airworthiness certificate and learn how to avoid some common pitfalls in the application process, including certification documentation, FAA records and the aircraft inspection process. This event is open to EAA Chapter 857 members and their guests only, please contact Stewart Beck for details. Also please click on the link below to see more details and to register for this event!

Directions: Please see additional information for detailed directions to meeting hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area
