

Gas & Go!

At this seminar we will be discussing the FAA's Next Generation Air Transportation System (NextGen): What is it? Why do we need it? What do we get out of it? We will also be discussing proper fuel management, improper fuel management causes far too many General Aviation accidents, nearly two per week on average! Whether the result of fuel exhaustion, starvation or contamination, these mishaps are easily preventable. Join us for a review of some past accidents and tools you can use to prevent yourself from becoming a fuel management statistic! Please click on the link below to see more information and to register for this exciting event.

Directions: Please see map link for directions, after turning on to Aviation Lane turn left into the first parking lot. Hangar is marked Westmoreland Aviation.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
