

How Much.... for That Little Light Bulb?

Ever wonder why your airplane light bulb costs 5 times as much as a car light bulb, or why the Pilot Operating Handbook (POH) says "reset the circuit breaker only ONCE"? Come to this interesting seminar and we'll explore how the FAA tests and approves components, and how manufacturers use the test results when writing operating procedures. We'll discuss the POH and how most emergency procedures are linked directly to tests that had to be passed for approval for your safety.

Directions: Please see map link for directions, seminar will be held in the Airport Conference Room.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
