

The FAA Safety Team presents:

## Can I Really Do That?

At this interesting seminar we will start with a discussion of what maintenance you, as an aircraft owner/operator can perform on your plane in accordance with FAA regulations. Our second topic to help make you a safer pilot, will be proper communications and procedures at non-towered airports, which can be a very challenging environment with a variety of very different general aviation aircraft. And finally in preparing for the Next Generation Air Transportation System (NextGen) Ron Yvanek, Owner of Airwork Avionics will discuss ADS-B and WAAS approach technologies. Please click on the link below for more details and to register for this event on-line.

**Directions:** Please see map link for directions, seminar will be held in the main room in the Terminal.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
