

Mastering the Art of Instrument Navigation

We are Proud to announce the Inaugural chapter
meeting of:

The Latrobe PA **IMC** club

November 20th 2013

KLBE Airport Authority Conference Room

7:00pm

Fellow Aviators,

My name is Frank Beresnyak. I am a CFII MEI ATP. I hope you will join me on November 20th at KLBE to join in on a topical discussion around Instrument flying.

What is the IMC Club?

IMC Club is the brain child of Radek Wyrzykowski; a Master Certified Flight Instructor Instrument and Multi-Engine Instructor. As a flight instructor in Norwood, Mass., Radek developed a volunteer mentor program to help instrument pilots improve their proficiency, and they loved it.

What is the purpose of the IMC club?

At IMC Club, our purpose is to promote instrument flying, proficiency and safety. Along with IFR flying and monthly local chapter meetings, we offer a resource-rich website which provides an electronic experience base.

Our intent is to create a community of pilots in order to share information, provide recognition, foster communications, promote safety and build proficiency in instrument flying. IMC Club Chapters offer monthly meetings in which pilots can network and share knowledge and experiences.

Do you need to bring anything?

First, bring your thoughts or story and be willing to share them with the group. This meeting is very interactive. Participation by the group is a key element to the IMC Club meeting.

Others have found it helpful to bring along a copy of their flight manual, GPS manual and charts. If you navigate with an iPad, bring it along.

Who can attend?

You don't need an instrument rating to attend. This meeting is open to all current, non-current, and future instrument pilots.

You can find more information about the IMC club at:
