

Ground Procedures and Non-towered Operations

Towered and non-towered airports each have unique hazards. Procedures can vary greatly from one airport to the next. Come join us as we cover safe operations in and around non-towered airports as well as airports with a control tower. We will discuss ground operations including hand signals and radio terminology. We will also review operations during airport events. Don't miss the exclusive event. Click the link below and register TODAY.

Directions: Please see map link for directions. The seminar will be held in the main room in the Terminal.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
