

Introduction to WeatherSpork

It's no secret that weather can be quite complex at times keeping you grounded. Sifting through dozens of weather charts and sorting through a bunch of antiquated text isn't a very effective way to make a go or stay decision. But there are better ways to make your preflight flight planning a breeze. In this discussion we will plan a cross country flight using WeatherSpork and demonstrate how to use its visualization tools and the "Wheels Up Departure Adviser" to find that perfect time to depart.

Directions: From the main pedestrian ticket entrance to SNF, CFAA is approximately 100 yards immediately to the left (west) of the main pedestrian ticket entrance on the same side of the street (Doolittle Road). The forum is being held in room CFAA-9.
