

Aeronautical Decision Making! Do the Right Thing!

Captain 'Bill' Machauer and Byron Hamby will go through the processes that lead to good decisions. Single-pilot resource management is a combination of art and science! Using new methods of gathering information in the cockpit is only one element of the safe completion of a flight. You also have to interpret the information and make good sound decisions to arrive at your destination. We will be using a scenario utilizing an iPad and the ADS-b receiver on a flight to help in making a good aeronautical decision.

Directions: Meeting room is in the Library Basement

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
