

Watch Out and Keep Your Motor Running!

Come to this fun and exciting event in which two topics will be discussed. We will start off with collision avoidance and discuss proper scan techniques, recommended traffic pattern procedures, and other suggestions to avoid mid-air collisions. Our second topic will be proper operations of aircraft reciprocating engines. Take care of your engine and it will take care of you. Learn how to save money and keep your airplane motor running to overhaul. Please click on the link below to see more details and to register on-line!

Directions: Please see map link for directions, conference room is on lower floor.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
