

The FAA Safety Team presents:

Don't Lose Control!

One of the most common causes of aviation accidents is loss of control. Loss of control frequently occurs in the airport environment (i.e., takeoffs and landings). At this informative seminar you will learn strategies and techniques for stall/spin recognition and recovery. You will also learn to develop skills to prevent you from reaching stall/spin situations. Please click on the link below to register for this event as seating is limited!

Directions: Please see Map Link for directions. Meeting will be held in Building 25 (McGowan Center) near the end of Washington Ave on right side, Room#1055. GPS Coordinates: N 41.43589 W. Park in parking lot behind building.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
