

Deadly Decisions

At this interesting seminar we examine several aircraft accidents in an effort to learn from other pilot's mistakes. We will review each link in the accident chain and how the use of tools such as the PAVE checklist can help make us safer pilots, by mitigating the risk of perceived hazards found during our preflight planning.

Identifying risks will give us the tools for better Aeronautical Decision Making (ADM) to help keep us and our passengers safe. Come join us and bring a friend. Please click on the link below for more details and to register on-line.

Directions: Please see map link for directions, event will be held in hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
