

## Airworthiness and Tailwheel Operations

At this informative seminar we will cover two important subjects. The first will be an Airworthiness refresher for pilots. During this discussion we will review such things as the definition of airworthy, who is responsible for the airworthiness of the aircraft, and required logbook entries. The second subject will be a review of Tailwheel Operations and causal factors for loss of control incidents and accidents in conventional gear aircraft. If you have flown tailwheels in the past or plan on flying them in the future this exclusive seminar is for you. Please click on the link below to register for this event TODAY!

**Directions:** The Luzerne County Annex is located on the left side as you enter the WBW parking lot.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
