

The FAA Safety Team presents:

What's in Your Fuel Tank?

Running out of fuel can be both frightening and catastrophic! We will start this seminar with a review of some NTSB fuel-related accident statistics, breaking them down by make and model. We will then address some of the FAA's concerns as well as the FARs on fuel reserves. We will discuss fuel management technologies as well as recommend three key success strategies that pilots can use for every flight. Lastly, we cover some mishap scenarios and present "Lessons Learned" and give some suggestions and cautions. A Pancake breakfast starts at 8:30 am please see additional information for details!

Directions: Please see Map Link for directions, at parking lot look for the "Pole Hangar" and follow your nose!

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
