

The FAA Safety Team presents:

Flight in the 'Danger Zone'

You may be surprised to learn that nearly all midair collisions occur during daylight hours and in VFR conditions. Perhaps not so surprising is that the majority happen within five miles of an airport. Don't miss this opportunity to refresh your knowledge on proper procedures when operating at a non-towered airport. Our guest speaker Paul Senyak, who has been a Designated Pilot Examiner for 40 years will bring his experience into our discussions of right of way rules, proper traffic pattern procedures, proper communications and much more. Please come to this exciting event and join in the discussions, to help us all become safer pilots in the airport traffic pattern. Also, following the Safety Seminar there will be a spot landing contest, please see "Additional Seminar Information" for details about entering the landing contest !!!

Directions: Please see map link for directions, classroom will be set up in hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
