

The FAA Safety Team presents:

## Tackling the Tailwheel

In the past year the Allentown Flight Standards District Office (FSDO) has seen an increase in the number of Tailwheel Accidents with over 50% caused by loss of control during landing. If you are considering flying Tailwheel Aircraft or are currently flying them, please come and join in the discussion. Our speaker Geoff Nye, CFII will cover some of the operational and handling differences between tailwheel and tricycle gear aircraft, with the goal of reducing accidents through education and the promotion of continual training. Donuts and coffee will be available at 9:30am. Seating is limited to 40, so please click on the link below to register on-line!

**Directions:** Please see map link for airport location.

\*PLEASE NOTE\* Bridge on Headquarters Road is closed, you may want to use Hollow Horn Road to Cafferty Road.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
