

The FAA Safety Team presents:

# Where Can I Fly and How?

This presentation will focus on how you can use the airspace to your advantage and how to stay safe, legal, comfortable, and confident in today's complex airspace system. We'll cover how to determine boundaries of various Classes of Airspace (Classes A, B, C, D, E, and G) and Special Use Airspace (Prohibited Areas, Restricted Areas, Warning Areas, Military Operating Areas, and Alert Areas). We'll also cover TFRs and Special Flight Rules Areas. We'll cover the requirements to enter these types of airspace in an easy-to-understand format. We'll touch on weather requirements. Local airspace will be used as examples. There will be time for Q&A. There will be handouts and lists of references. We will also have with us John Herber, Support Specialist, from the Allentown Tower and Approach Control who will add to the discussion and be available to answer questions you may have. Please click on the link below and register for this exciting event!!!

**Directions:** Please see map link for directions. The seminar will be hosted in the Sky Manor Air Repair Avionics Hangar.

**A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
