

FAA Safety Team presents:

Surprise! Surprise!

At this interesting program we will view four short videos that tell a story of events preceding a flight and then the flight itself. We will discuss factors that contribute to Loss of Control accidents including; pilot proficiency, Aeronautical Decision Making (ADM), inadequate hazard identification and risk assessment, hazardous operational environments, and human factors. This presentation focuses on loss of control event precursors that pose no inordinate threat individually but, taken together, nearly cause a disaster. Please come and join our discussions and bring a friend. Click on the link below and register for this event today!!! Refreshments will be provided.

Directions: Go to passenger boarding lounge.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
