

The FAA Safety Team presents:

**Surprise! Surprise!**

At this interesting program we will view four short videos that tell a story of events preceding a flight and then the flight itself. We will discuss factors that contribute to Loss of Control accidents including; pilot proficiency, Aeronautical Decision Making (ADM), inadequate hazard identification and risk assessment, hazardous operational environments, and human factors. This presentation focuses on loss of control event precursors that pose no inordinate threat individually but, taken together, nearly cause a disaster. FAA Inspector Bill VanArtsdalen will also conduct a short briefing on the FAA's new Compliance Philosophy. Click on the link below and register for this event today!!! Refreshments will be provided.

**Directions:** Please see map link for direction, seminar will be in Keystone Hall, Room 202. Please see Additional Public Documents for College Campus Map.

#### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
