

Caught by Surprise

"Surprise You just lost control of your aircraft! It's certainly a surprise because no one plans to lose control unless you are practicing aerobatic maneuvers that involve intentional out of control flight. Loss of Control - In Flight (LOC-IF) is evident in more general aviation fatal accidents than any other cause. So, if you ARE surprised by an LOC-IF what can you do? Better yet, what can you learn to prevent LOC-IF? And, what are the typical general aviation LOC-IF scenarios to precipitate LOC-IF? Please join us at this interesting Safety Seminar in an effort to prevent Loss of Control accidents. Geoffrey R. Nye will be receiving the prestigious Wright Brothers "Master Pilot" Award at the start of our program. Register for this event on-line today!!!

Directions: Seminar will be held in the main hangar.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
