

FAA Safety Team presents:

# How NOT to Fall Out of the Sky!

At this spring event, we will discuss two subjects which are causal factors in many aircraft accidents. The first subject to be discussed will be Loss of Control, in which we will look at scenarios which lead to a loss of control of the airplane and what we can do to prevent and perhaps recover from these situations. Our second subject will be Fuel Exhaustion, which continues to be the greatest cause of engine failures. We will discuss what happened in accidents resulting from fuel mismanagement including human factors, contamination, and mechanical issues. We'll cover what led to these accidents and what can be done to break the accident chain. So come on out and invite a friend and let's get prepared for another safe year of flying ....Please register at the link below, for this event today!!!!

**Directions:** Meeting room is located on the lower level of the library.

#### **A message from the National FAASTeam Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
