

Go-Around Versus a Balked Landing?

Many stall/spin accidents occur during the early stages of a go-around or balked landing. Don't miss this interactive program where we will discuss the differences between a go-around and a balked landing. Which of the two maneuvers do you think has the most risk? So come out and participate in the discussions of some of the most common mistakes made when performing these maneuvers and learn how you can avoid becoming a statistic! Also, following the Safety Seminar there will be a spot landing contest, please see "Additional Seminar Information" for details about entering the landing contest !!! Coffee and refreshments will be provided.

Directions: Please see map link for directions, classroom will be set up in hangar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
