

The FAA Safety Team presents:

Special Use Airspace Explained

The Code of Federal Regulations (CFR) 14 CFR Part 91.103 specifically states, "Each pilot shall become familiar with ALL available information before beginning a flight". This would include information on any Special Use Airspace that may be along a pilot's planned route of flight. As there are multiple types of special use airspace, the requirements for operating in each can vary depending on many factors. As they say, "the devil's in the details." FAASafety Team Representative and local DPE Mike Brubaker will present this safety seminar on Special Use Airspace, in an effort to educate pilots about what types of special use airspace exist, what is required to operate within such areas, as well as possible safety hazards. Please register for this event at the link below!!!

Directions: Please go to Map Link for directions, seminar will be held in Keystone Hall, Room 202.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
