

Avoiding the Perils of Night Flight and CFIT

At this interesting Seminar we will discuss two important subjects from a situation awareness point of view, Night Operations and Controlled Flight Into Terrain (CFIT). Concerning Night Flights we will discuss what's required for the pilot & plane to be legal after sunset as well as how to mitigate potential hazards associated with flight at night. For CFIT we will discuss the significant number of pilots who fall victim to flying a perfectly good plane into the earth. Our focus will be on what went wrong, and how to avoid mistakes that lead to this type of accident. Please click on the link below and register to day as seating is limited !!!

Directions: Seminar is located in the downstairs meeting room.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
