

FAA Safety Team presents:

Helicopter Safety Statistics and the Wire Environment

At this interesting webinar our guest speakers Dan Arenson and Mike McIntyre who are both experienced Helicopter Pilots and currently Designated Pilot Examiner's (DPE's) for the Allentown Flight Standards District Office (FSDO), will bring real world experience into the discussion. We will examine helicopter accident statistics and discuss the hazards of power lines in the low level environment, in an effort to increase safety by making Helicopter Pilots more aware of some of the dangers associated with operating at low altitudes. Please us your faasafety.gov email when registering on Zoom to receive WINGS credit!
