

Preventing CFIT

Controlled flight into Terrain (CFIT) is one of the scariest and deadliest form of aviation accidents. The General Aviation Joint Steering Committee (GAJSC) study of General Aviation CFIT Accidents revealed over reliance on automation as a precursor to some mishap events. They found that automation use contributed to VMC and IMC accidents in day and night flight conditions. Awareness of automation limitations and pilot proficiency in flying with and without automation are key to safe flight operations.

Please join us as we go over some helpful information to prevent these events from happening.

The event will be held in the dining room of the Cherry Ridge Airport Restaurant

Event Details

Mon, Oct 16, 2023 at 18:00 EST
Cherry Ridge Airport Restaurant
30 Bomber Lane
Honesdale, PA
