

## Preventing Maintenance Related Accidents

At this interesting seminar we will look at the Topic of the Quarter from the General Aviation Joint Safety Committee (GAJSC). The GAJSC selects subject matter based on, and directly linked to, an analysis of accident and incident data that shows a commonality of risk factors nationally.

Usually when we discuss aircraft accidents, we examine cases of pilot error. We will now take a look at improper maintenance practices and talk about ways to keep an eye out to make your next flight safer.

Please come out and join us both mechanics and pilots can benefit from this presentation.

Inside the Cherry Ridge Airport Cafe
