Lead Representative MICHAEL THOMAS
BEVAN

Reducing the potential for runway incursions and runway collisions is a top priority for the FAA. Runway safety management is a dynamic process that involves analyzing runway incursions, understanding the factors that contribute to runway collision risks, and taking actions to reduce these risks. Attend this informative briefing with featured speaker Christine Madden and learn the best practices for keeping you and your passengers safe on the surface! This is one of six seminars at the Maryland Regional Festival of Flight.

Directions: Please see the "Additional Seminar Information" for important driving and fly-in directions.

A message from the National FAASafety Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
