

The FAA Safety Team presents:

Night Flying at the Maryland Regional Festival of Flight

Ninety-five percent or more of flight time logged by private pilots takes place in daylight. This statistic seems to warrant a close review of night flying techniques, since we seem to fly at night so infrequently. As members of the human species and from a physiological point of view, we are better adapted for daytime activities. Featured speaker for this topic is Adrian Eichorn, a FAA Safety Team Representative, active flight instructor and airline pilot. Adrian will refresh your nighttime flying skills and share his best practices for operating at night. Attend this exciting briefing and enjoy all the other attractions at the Maryland Regional Festival of Flight. Click on the link below to see all the details!

Directions: Take MD Route 50 to Stephen Decatur Highway (611) about 3/4 miles West of the bridge into Ocean City, head South on Stephen Decatur Highway then turn left on Airport Road.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
