

Meet the Controller

Martinsburg ATC Tower controllers will present a program describing safe Class D procedures and communications. This is an interactive discussion that allows controllers and airport users to clear up confusions about operations in the Martinsburg Class D. A presentation on the differences in CTAF, UNICOM, and Control Tower frequencies will help identify when each should be used.

Directions: I-81 Exit 8 in WV. East on Tabler Station Road. Tabler Station becomes Novak Drive at Sheetz store. Continue on Novak 1/2 mile to Pilot Way on your left.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
