

BAL FAAS Team presents:

Aerospace Medicine and You

FAA's Office of Aerospace Medicine provides medical certification guidance and medical information to pilots. BasicMed – an alternative to traditional pilot medical certification is available to most pilots who are not engaged in flying for compensation or hire. The effects of commonly prescribed and over-the-counter drugs can comprise pilot's ability to fly safely. Pilots must consider the effects of combinations of drugs. This is difficult to do without consulting a physician. AMEs are the best source for the effects of drugs and combinations of drugs. Pilots must disclose all of their medical issues to their AMEs in order to receive a comprehensive assessment of their medical condition and fitness to fly.
