FAASTeam presents:

CFIT Avoidance Technology

Controlled Flight into Terrain (CFIT) accidents and incidents continue to occur in General Aviation operations.

Although we might expect most CFIT accidents to occur in poor weather and/or night, typically more than 75% of CFIT accidents occur in daylight and more than half of those are in visual conditions.

More than a third of CFIT accident pilots hold Instrument ratings.

There are numerous CFIT Avoidance technologies available to GA Pilots.

Sign up by clicking the link below. If you've registered before, that will activate reminder emails 24 hours and 1 hour prior to showtime. If you're new, on the web "splash" page that opens, enter your name and email address. Use the email address
