

FAASTeam presents:

# 'Step On the Ball': Aerodynamics 101

Ask any pilot examiner which knowledge area most candidates lack, and the answer is always "aerodynamics". Why is it a 777 captain tragically lands a perfectly good airplane horribly short on a visual approach with fatal consequences while an Airbus captain skillfully "dead-sticks" his loaded aircraft into the Hudson River with no injuries? Most pilots today have the technical knowledge to navigate with GPS, AHARS, and sophisticated autopilots, but lack the basic comprehension of energy management, angle of attack, stalls, spin awareness, slips, and skids. Attend this seminar and learn from a professional pilot and aerobatic Master instructor with over 30,000 flight hours. Gain understanding in the fundamentals of aerodynamics in a two-hour, jam-packed seminar that is guaranteed to make you a safer pilot. Seating is limited. Click the link below to register below TODAY.

**Directions:** From Interstate 81, Exit on the No 13 Exit. Follow signs for the Virginia Highlands Airport. Seminar will be held in the Airport Terminal Building

#### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

## Event Details

**Sat, Apr 18, 2015 - 09:00 EDT**

**Virginia Highlands Airport**

18521 Lee Highway

Abingdon, VA 24210

**Contact: Bob Sutherlin**

**336-369-3949**
