

Performing an Advanced Preflight on Your Aircraft

The Advanced Preflight is designed to assist the pilot by strengthening his/her aircraft preflight knowledge beyond the standard use of the checklist. This program provides pilots with additional skills and techniques that they can apply to their preflight inspection in conjunction with their standard aircraft preflight checklist. This becomes the last opportunity to determine aircraft airworthiness before a flight.

Directions: The Seminar will be held at the Republic Airport Main Passenger Terminal, First Floor Lobby.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!
