

The FAA Safety Team presents:

FAASTeam Flight Instructor Open Forum #3

Some of the deadliest accidents involving airplanes have occurred not in the air, but on the runway. This problem, though simple on the surface, requires all parties involved in airport operations to work together to create a safer, more vigilant environment. The overall numbers are trending at a constant rate of approximately 975 runway incursions per year throughout the National Airspace System. So, how do you teach airport surface safety? Are you using the best practices recommended by the FAA and industry experts? Do you demonstrate the common errors? Flight Instructors, Ground Instructors, Designated Pilot Examiners, and Instructors in training are welcome and encouraged to attend. Join your flight instructor colleagues and take an active role in improving safety in flight training! Don't miss this important event. Kindly note the change of venue location to IBM's Hangar W.

Directions: Please view map link and "Additional Seminar Information" for directions.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
