

IMC Club - New York Chapter Meeting

This scenario requires a departure from an airport that has published standard instrument departure (SID) routes. Although a SID will keep aircraft away from terrain, it is optimized for ATC route of flight and will not always provide the lowest climb gradient. Test your ability! You are invited to ride along on this re-creation of what actually happened to John and Bob and how to best prepare yourself when this happens to you! Click on the link below and register TODAY!

Directions: Republic Airport is located off Route 110 near the Control Tower that is easily accessible from the Southern and Northern State Parkways and the LIE.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
