

IMC Club at Republic Airport

Guest speaker, Ed Sosa, Manager of the New York Tracon will be making a presentation. Every good pilot should play the "what if" game and think through the process for managing common IFR emergencies. This will have you better prepared if you should ever encounter the real thing. Well, here's your chance to experience a simulated emergency situation. Electrical failures require an immediate reaction and sound decision making to guarantee a safe and uneventful outcome. Choosing the best place to land is important, but also how you manage the flight to your chosen landing location is equally (if not more) important. Click the link below to register TODAY!

Directions: One block West of Route 110, Terminal Building is just south of FRG Control Tower.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
