

IMC Club

This scenario introduces a host of potential challenges that instrument pilots face when flying single pilot operations. After a long cross country trip, you are faced with the prospect of making an approach to minimums with deteriorating weather and strong turbulence. To make matters worse, you are attempting the approach at night after a long day of flying. This sets up many potential hazards that must be managed properly in order to guarantee a safe outcome. Click the link below and register TODAY.

Directions: Upstairs Conference Room 201

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
