

IMC Meeting

Medical emergencies are always a source of concern in aviation, but they take on added significance in IMC. In this scenario, you are responsible for tending to a sick passenger, making a plan to get them on the ground quickly and then executing an instrument letdown, approach and landing. If it sounds like a lot of responsibility...it is! This is all part of being the "Pilot in Command". See how you handle this challenging scenario. Click on the link below and register TODAY.

Directions: See map link for driving directions.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
