

## IMC Meeting

The advancement of modern GPS units has had a remarkable and positive impact on pilots who fly IFR in General Aviation airplanes. This technology opens up many new options for IFR pilots in terms of navigation and approaches into airports. In addition, GPS can provide an enhanced level of situational awareness and these units have proven to be extremely reliable over time. However...GPS units and satellite transmissions can and do fail. Yet because they are so reliable, we don't often consider how a failure will impact a typical IFR flight. Even a partial loss of your GPS unit can have a significant impact, here's your chance to experience it first-hand.

**Directions:** See map link for driving directions.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

### Event Details

**Tue, Sep 23, 2014 - 7:00 pm**

**FRG Terminal building**

7150 Republic Airport

Farmingdale, NY 11735

**Contact: JOHN ANTHONY KOLMOS**

**(631) 905-7188**
