

## FAASTeam Flight Instructor Open Forum

At this Flight Instructor Open Forum, we will be discussing techniques and methods of teaching Stalls and Spins including entry, recognition and recovery. Loss of Control – In flight (LOC-I) is one of the leading causes of fatal General Aviation Aircraft Accidents. Many LOC-I accidents result in stall/spin fatalities. As an instructor, by teaching students to become proficient in how to recognize and recover from stalls and spins you are helping to create a safer pilot. Please click on the link below to register for this event today! This event is for CFI's and DPE's only.

**Directions:** The event will be held in the First Floor Conference Room.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
