

Farmingdale FSDO & The FAA Safety Team presents:

A Study in Airmanship

The infusion of modern technology into the general aviation cockpit has caused a decline in the basic flying skills as observed by major airline pilot and FAA Designated Pilot Examiner Adam Rosenberg. While this seminar is geared towards active flight instructors looking to improve the quality of the training they provide, anyone with an interest in improving their flying skills is encouraged to attend. Accuracy is the mark of the professional and even though flying may not be your profession it doesn't preclude you from flying like one.

Following the review of Commercial maneuvers, Adam will do a brief presentation on pursuing a career in aviation and will be available to answer questions, give advice, strategies and to critique resumes. Don't miss this exclusive event. Click on the link below and register TODAY.

Directions: The seminar will be held on the ground floor of the Republic Airport Main Terminal Building.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
