Select #: EA1168722

Lead Representative JOHN ANTHONY
KOLMOS

In a uniquely different approach this meeting will look at two different scenarios both having to do with iPads. The first scenario is based on that iPads and other EFB devices have become increasingly popular in the cockpit with the incredible situational awareness and detailed information they provide. In this scenario, you are on an IFR flight you make frequently, but this time something goes wrong. Does your iPad help you or hurt you in this situation?

The second scenario deals with the fact that not everyone can afford a glass panel in their aircraft, but the iPad revolution means anyone can have a moving map and backup attitude indicator for less money than a new TV. Having that backup is one thing, but using it to replace the installed equipment is something else. What would you do when faced with exactly that need?

Directions: The meeting will be held at the Farmingdale Airport Terminal Building, 2nd Floor Conference Room.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
