

Balked Landings verses Go-Around

The early stage of a balked landing/go-around is when many stall/spin accidents occur. What's the difference between a go-around, rejected landing, and a balked landing? What are some of the common errors when performing these maneuvers? How can you avoid becoming a statistic? FAASTeam Representative Brenda Zittle will be briefing us on using the new MedXpress which will become mandatory starting October 1, 2012.

Directions: See Map Link to the Main Hangar

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
