

Tower Operations: IFR and VFR

The first Tuesday of every month, we meet to discuss a new challenging scenario, as well as other aviation topics. This month, Al Hubler will be joining us to share his experience, not only as an accomplished pilot, but also as a full time Air Traffic Controller. He will talk about communicating with and operating in a Tower environment, and share many lessons he has learned over the years.

Directions: Reigle airport is on the west side of Rt. 117 (Forge Road), between Campbelltown and Palmyra, just north of the traffic circle.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
