

Portable ADS-B Traffic - Understanding What You Don't See

What is ADS-B and how does it work? When is it required? What services are provided? What is the coverage area? Animated real-life scenarios of traffic limitations when using ADS-B receivers.

Portable ADS-B receivers have exploded onto the market lately, giving pilots in-flight weather and traffic updates displayed on an iPad.

Unfortunately, it provides an incomplete picture that could lead to disaster if you don't know what you're missing. Eric Rush, pilot/aircraft owner from AOPA will explain the pros and cons of ADS-B traffic on your iPad. Don't miss this exclusive event. Click the link below and register TODAY.

Directions: The seminar will be held in the Terminal Building.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
